

Honorable chairs, fellow delegates, esteemed guests, the delegate of the United Kingdom is here to discuss two matters that are concerning the League of Nations, which is why this organization will fall apart if we don't put sanctions on the people held responsible for the tragedy that is the Manchurian crisis and the Abyssinia crisis, the Manchurian crisis is when Manchuria fell into the hands of many great powers at different points in time, and was completely misused and created a great amount of tension between many member states of the League of Nations, the second issue is the Abyssinia crisis which is what made the League of Nations end as many countries started to attack each other, Abyssinia was a land in Ethiopia that Italy wanted to take over and started to cause create chaos between themselves and the League of Nations, the delegate of the United Kingdom believes that the league should create a peace treaty concerning the Abyssinia crisis and as for the Manchuria crisis the delegate hopes for this council to coordinate to help prevent the the vast destruction of great cities, families, lives around the globe.
